# RESEARCH STUDY

Social Intelligence Quotient a Scholastic Performance of Cooperative Management Students

## **Objectives**

Aimed at determining the social intelligent quotient and scholastic performance of cooperative management students.

### **Highlights**

The results revealed that the cooperative management students had high intelligence quotient and good to very good scholastic performance. There was no significant relationship between the level of social intelligence quotient and scholastic performance of cooperatives management students.

#### Recommendation

- 1. With the findings of this study as guide, in depth studies about social intelligence shall be done to determine its true influence on scholastic performance of students.
- 2. More activities and strategies should be conducted by teaching to facilitate, enhance, and increase the level of social intelligence and scholastic performance of the students.
- 3. Future researches may be conducted to validate the results of the study.
- 4. Other small businesses must create their internet connection to improve not only their communication skills but also their social capabilities.
- 5. BCM students should be aware of the extent of internet usage among selected cooperatives in Iloilo City so they can use in future endeavors. It can also help them utilize their internet knowledge in their potential employment.
